1.2 Background

Information Technology Services Overview

Information Technology Services (ITS) is a multi-functional team, led by the Chief Information Officer, which oversees the technology architecture for the nation's second-largest school district. ITS plays a crucial role in supporting the District's educational and administrative functions for over 1 million users across 1,324 schools. The Division supports the District's core instructional mission with efficient solutions to facilitate high-quality instruction to foster each student's path to college and career readiness.

ITS's mission is to enable student achievement and operational efficiency through deployment of appropriate technical solutions for our students and their families, our employees, and the community.

For additional information, please refer to the ITS (Information Technology Services) website (<https://its.lausd.org/>).

School Support Applications Overview

1.3 Terms of an Agreement

The contract resulting from this solicitation will be Time and Materials, based on a defined, not to exceed work order amount. The anticipated period of performance shall be from August 1, 2026 through January 31, 2027.

All registering companies must agree to be bound by the applicable terms and conditions governing use of ARIBA™. In the event ARIBA™ elects to offer certain optional or premium services to registered companies on a fee basis, the registered company will be given the opportunity to either accept or reject the service before incurring any costs and still maintain its registration.

Companies may register at <https://service.ariba.com/Authenticator.aw/ad/ssolDP>
