Description

Background:

The United States Secret Service has an urgent and compelling need for the installation of Dejero Gateway Network equipment and Tactical IP Blend services within it's fleet of four (4) MCUs to support interagency coordination, communication, and command and control at USSS protected sites and areas protected by 18 U.S.C. § 1752. The equipment will provide a secure data connection within MCUs enabling uninterrupted use of protective technologies and equipment. The equipment is used to combine six cellular networks – plus satellite and broadband into one optimal connection.

The purpose of this Sources Sought notice is to seek information from sources that may be capable of providing a solution that will achieve the specifications described in the attached Statement of Work (SOW).

CAPABILITY STATEMENTS

Capability statements should provide a clear and concise understanding that your company has the ability to fulfill the USSS requirement outlined in the attached SOW.

Any capability statements that are unclear or broad/generalized in nature, or that the agency is unable to adequately determine that your company is able to fulfill this requirement, will not be considered.

Please do not provide proprietary information in your response. Formatting must be in either Word or PDF.

Your capability statement is limited to two (2) pages and should include the following, at minimum:

Company name, address, name of contact for follow-up questions, email, phone number, and SAM Unique Entity ID (UEI). If your company holds any existing Federal Supply Schedule contract(s), or other contracts that USSS can utilize to fulfill this request, please include this information and applicable contract #.

Identify prior experience completing projects similar in nature to the installation requirements outlined in the attached SOW. To demonstrate their ability to provide a fully integrated connectivity solution that supports seamless blending and management of communication pathways including: cellular satellite and Wi-Fi networks through a single platform.

Documentation demonstrating the solutions ability to integrate within existing mobile communication infrastructure and support flexible IP based networking requirement. Evidence of successful deployment of similar solutions supporting public safety mission, emergency response environments. Identification of required hardware, software, licensing or third-party services to achieve full operational capability. This should include the customer/agency, dollar value of project, description of project, and any applicable pictures of construction, assembly, or finished product of such projects.

RESPONSES

No telephone responses will be accepted. Information received will be utilized for market research purposes, and a determination of sources within the industry that may be capable of providing a solution that will achieve the specifications described in the attached Statement of Work. Any information submitted by respondents is strictly voluntary.

Capability statements shall be email to crystal.garcia@uss.s.dhs.gov and caitlin.minor@uss.s.dhs.gov . All required information must be received no later than June 19, 2026 7:00 a.m. EST.
