NC CAMPO Data Management Modernization Study FY 2027

**Capital Area Metropolitan Planning Organization
June 16, 2026**

REQUEST FOR PROPOSALS (RFP)
CAPITAL AREA MPO
DATA MANAGEMENT MODERNIZATION STUDY

PURPOSE

The North Carolina Capital Area Metropolitan Planning Organization (CAMPO) invites qualified consulting firms to submit proposals to modernize CAMPO’s data management environment that supports development and maintenance of the Metropolitan Transportation Plan (MTP), Transportation Improvement Program (TIP), Locally Administered Projects Program (LAPP), and Wake Transit Plan/Program data. CAMPO currently maintains multiple Microsoft Access databases for critical MPO functions. This project will deliver a modern, secure, scalable solution that supports efficient workflows; enables simultaneous multi-user data entry and review; connects related data stores; and improves accessibility for authorized users beyond the internal firewall. The solution must also support secure external intake of consultant produced datasets tied to MTP recommendations (via guest upload accounts or importable schema templates) and interoperable data exchange with partner systems (e.g., NCDOT’s cloud-based TIP system) through APIs or equivalent secure interfaces. Consulting services are sought for the following components:

1. Conduct a one-time migration of CAMPOs current data ecosystem to a new platform based on requirements described in the scope of services portion of this proposal.
2. Provide ongoing support, training, and maintenance services for the updated solution as described in the scope portion of this proposal.

PROPOSER EXPENSES

The NC Capital Area MPO will not be responsible for any expenses incurred by any Proposer in the development of a response to this Request for Proposals or any other activities associated with this procurement including but not limited to any onsite (or otherwise) interviews and/or presentations, and/or supplemental information provided, submitted, or given to the MPO and/or its representatives. Further, the MPO shall reserve the right to cancel the work described herein prior to issuance and acceptance of any contractual agreement/purchase order.

1.0 INTRODUCTION

1.1 OVERVIEW

The Federal Aid Highway Act of 1962 required that transportation projects in urbanized areas of 50,000 or greater in population be based on a continuing comprehensive urban transportation planning process undertaken cooperatively by the states and local governments. In an effort to complete this transportation planning process in an effective manner, the North Carolina Capital Area Metropolitan Planning Organization was created. The current CAMPO planning area boundary encompasses over 1,600 square miles and a population of more than 1,000,000.

CAMPO is tasked with providing a regional, comprehensive, and cooperative planning process that serves as the basis for the expenditure of all federal transportation funds in the area. Under Section 134 of the Federal Highway Act of 1973, MPOs are required to prepare long range transportation plans for the planning area with a minimum of a 20-year planning horizon.

The Town of Cary serves as the Lead Planning Agency (LPA) for the MPO. The MPO is required to complete the transportation planning process in a continuing, cooperative, and comprehensive manner.

1.2 BACKGROUND

CAMPO has grown in agency size and responsibilities, expanding use of internal databases from one or two small Access files used by 3–5 staff to five distinct databases maintained by multiple key staff and now supporting ~20 users. Legacy constraints have reached critical mass: simultaneous editing limitations, siloed data that must interact across programs (TIP, LAPP, MTP/CTP, Wake Transit Plan),

slow performance due to complex query and reporting requirements, and access limited to the internal network (VPN required). A prior internal and informal initiative mapped cross-program data workflows and business rules; the current legacy solution has outgrown its useful lifecycle and requires modernization to meet present and future needs.

2.0 PROJECT SCOPE

2.1 OBJECTIVES

The selected consultant will plan, design, and implement a modern, secure, and scalable data platform using best IT practices for multi-program MPO data management (roadway, transit, bicycle/pedestrian). The scope includes functional modules specified by CAMPO for the following programs: TIP, LAPP, MTP/CTP, Wake Transit Plan. The system must support external consultant data intake for MTP/CTP recommendations and interoperability with partner systems (e.g., NCDOT's cloud-based TIP platform) through secure, documented APIs or equivalent mechanisms.

The MPO has established the following objectives for this study. Any changes to the specification or scope of work will be made in the form of an Addendum to this Request for Proposals and will be supplied to all prospective proposers and posted on the MPO's website. The MPO reserves the right to negotiate and refine the final scope of work with the selected proposer.

- a. System Assessment & Modernization Strategy:
 - i. Inventory & Assessment: Evaluate current CAMPO databases, workflows, data models, quality controls, permissions, and cross-program dependencies for TIP, LAPP, MTP/CTP, and Wake Transit Plan. Identify pain points, duplication, and integration needs.
 - ii. Requirements Definition: Facilitate working sessions with key leadership, power users, and subject matter experts (SMEs) to define functional requirements, roles, governance needs, and reporting outputs across all modules.
 - iii. Solution Architecture Options: Recommend architecture options (e.g., cloud/onprem, SaaS/custom, relational database with web-based UI, role-based access, audit trails) that support multiuser concurrency, secure external access, robust querying, and integration with GIS and business intelligence/reporting tools.
 - iv. Migration Strategy: Prepare a phased migration plan, including data cleansing, transformation, validation, and cutover steps designed to minimize downtime and risk.
- b. Data Model & Application Design (Modules: TIP, LAPP, MTP, Wake Transit):
 - i. Unified Data Model: Design conceptual, logical, and physical data models that duplicate and connect formerly siloed information and represent program relationships across TIP, LAPP, MTP, and Wake Transit Plan.
 - ii. TIP Module (Entry, Amendments, Lifecycle, SPOT History View, NCDOT Integration):
 - a. Support TIP project entry, amendments/modifications, and lifecycle tracking (e.g., initiation, design, ROW, construction, closeout).
 - b. Provide read only Prioritization/SPOT history view for contextual reference (no scoring/ranking computations).
 - c. Provide API based or equivalent secure interoperability with NCDOT's cloud-based TIP solution (e.g., authenticated data exchange for project metadata,

- amendments, statuses, and funding updates), including mapping between NCDOT and CAMPO data structures.
 - iii. LAPP Module (Locally Administered Projects Program):
 - a. Enter, modify, and track LAPP projects, prioritization results, funding, milestones, schedule changes, and delivery status.
 - b. Provide configurable reports for program oversight and audit readiness.
 - c. Support recurring batch project entry using outputs from current project submission process and platform (Survey123).
 - iv. MTP Module (Project Inventory & Recommendations; External Data Intake):
 - a. Maintain MTP project inventory and recommendations, including new project entry and modification, lifecycle tracking and advanced project development tasks (batch attribute updates, sequential project tagging, parent-child project splits, replication, and rollbacks).
 - b. MTP data rollover from one MTP planning cycle to the next, including automatic attribution updates, recycling, and nullification.
 - c. Maintains data relationship with CAMPOs Roadway Prioritization and Fiscal Constraint tools.
 - d. External Intake – Method A: Support guest upload accounts with limited permissions for consultants to submit study datasets/deliverables tied to MTP recommendations.
 - e. External Intake – Method B: Enable CAMPO to export a structured Excel/CSV template (schema) that external parties populate for direct import by CAMPO staff, with validation and error handling.
 - v. Wake Transit Module:
 - a. Track projects, funding/programmatic elements, milestone progress, and inter agency coordination fields.
 - vi. User Workflows & Interfaces:
 - a. Define role-based workflows for viewing, entering, modifying, and approving data, including versioning/audit trails and change management.
 - b. Provide user interfaces and APIs supporting robust querying and reporting.
 - vii. Reporting & Dashboards (Internal):
 - a. Provide configurable reports (e.g., project history, amendments log, funding summaries, lifecycle status) and internal dashboards supporting staff oversight; architect to allow optional future public dashboards if CAMPO elects.
 - c. Implementation, Data Migration & Integrated User Notifications:
 - i. Prototype & Iterative Validation: Develop a working prototype covering representative functional areas for early validation by CAMPO staff.
 - ii. Production Implementation: Build the production solution, implement security, roles/permissions, validation rules, audit trails, and performance tuning; migrate data per approved plan; stand up environments (dev/test/prod) with backup/recovery procedures.
 - iii. Testing & Data Integrity: Execute unit, system, integration, and user acceptance testing; remediate defects; validate data integrity; provide test plans and results.
 - a. Integrated Notification & Engagement Enhancements:
 - i. User Tagging: Allow users to tag other users in notes/comments and trigger notifications.
 - ii. Expanded History Tracking: Enhance event/change logs to succinctly

- describe system updates and align with notifications.
 - iii. “My Projects” Preferences: Users can opt for notifications on all projects, agency associated projects or manually selected My Projects.
 - iv. Homepage/Dashboard: Provide a per-user homepage presenting recent activity, notifications, potential action items, and tagged notes.
 - v. Using identified relationships among project programs from unified data model, design and implement an automated notification routine informing users of any changes to a project that may also impact associated projects in other programs.
 - vi. O&M Inclusion: Maintain these features as part of regular operations & maintenance, without separate licensing.
- d. Documentation, Training & Knowledge Transfer:
 - i. User & Admin Documentation: provide comprehensive user manuals and administrator guides, including instructions for modifying fields, adding data elements, new users and permissions, and accommodating future program changes.
 - ii. Training: Deliver recorded virtual and in-person training for applicable staff, covering daily use, approvals, reporting, data governance, and support procedures.
 - iii. Knowledge Transfer: Provide configuration artifacts, environment diagrams, and runbooks to ensure long-term maintainability by designated CAMPO staff.
- e. Governance, Security, Interoperability & Maintenance:
 - i. Data Governance: Establish policies for data stewardship, permissions, approval workflows, data quality checks, and audit trails across TIP, LAPP, MTP, and Wake Transit Plan.
 - ii. Security & Access: Define authentication/authorization consistent with CAMPO/Town of Cary IT policies, enabling secure access beyond the internal firewall for authorized users and external guest accounts used for MTP intake.
 - iii. Interoperability & Partner System Integration: Implement API based or equivalent secure mechanisms to consume and/or exchange data with partner systems (e.g., NCDOT’s cloud-based TIP solution), including field mapping, synchronization strategies, and error handling.
 - iv. Operations & Maintenance (O&M): Provide an O&M plan with updates cadence, support SLAs, performance monitoring, capacity planning, disaster recovery, and roadmap considerations.
