Initiative

- None

## Description

The Food and Drug Administration (FDA); Division of Product Quality and Research (DPQR) requires an advanced image analysis platform that can provide the reviewers and regulatory researchers to assess the impact of process parameters and material attributes on product quality attributes, such as content uniformity, microstructural deformation, and release profile. A cloud-based powerful image analysis platform can meet these requirements. DPQR has its own high performance computing (HPC) environment.

See Documentation for complete details.

The Government is in no way obligated to make an award, nor to pay any costs incurred by the Contractor in preparing and submitting its quote.

## Contact Information

### Primary Point of Contact
