Event Description

The Department of Technology (DT) for the City and County of San Francisco is seeking information on modern Warehouse Inventory Management solutions to support the management of non-serialized consumable materials used across departmental technology operations. DT is interested in a cloud-based Software as a Service (SaaS) platform that can centralize receiving, inventory tracking, distribution, and reporting for consumable assets stored in the DT warehouse. The desired solution will streamline warehouse workflows, automate inventory transactions, and provide real-time visibility into inventory levels and usage across operational teams.

The RFI is not a competitive solicitation. This RFI is to be used solely for information and planning purposes by the City and will not result in a contract. As part of this, the City reserves the right to invite vendors to demonstrate their products and services. Submissions will not be scored or otherwise evaluated for merit. The City will not reimburse participants for any costs in connection with this RFI.
